

I pay for XM Radio, just like any other service. You have no right to take away weather and traffic updates, we subscribers need them! XM is the best thing that has ever happened to the radio, it's clear, commercial free, coast-to-coast coverage, it's perfect. This is 2004, and the last time I checked this is America and America is a free country. So if XM wants to provide their customers with quality radio, so be it! Don't listen to any other stations etc., because they have no limitations or certain restrictions on what they can play for their listeners, so why should XM? There are jealous of XM and its ability to provide a commercial free network. LEAVE XM SATELLITE RADIO ALONE!!!
